

## Painting With Light!

Your task for today is to do some research on painting with light and within your groups decide on an object/subject that you would like to use and your approach to lighting it.

Students will produce ONE image per group member

Students will work in groups of 3 for this assignment.

My advice would be for one individual to figure out your process before allowing another group member to begin lighting their object/subject. This will allow for everyone to learn about this technique with a greater understanding as well as the ability to teach your fellow group members a few tips and tricks you picked up while doing the assignment yourself.

Students who choose their object/subject WILL NOT be allowed to change their mind midway through completion – Stick to your original ideas but make sure it will be feasible which means you will be getting the idea approved by your teachers before getting the green light.

As well, there is no magic formula for this technique – a good composition takes practice, patience and trial and error – you will make mistakes but that's okay! You will have your group members as well as your teachers for support.

No spelled words or names will be accepted for this assignment – step outside of your comfort zone!

Be creative and allow your imagination to run wild!

## What am I looking for??

A well composed image

A solid black background.

Subject MUST be in focus!
